Forward-Looking Statements

Forward Looking Statements are statements that are not historical facts and are generally, but not always, identified by the use of forward looking terminology such as “plans”, “expects”, “is expected”, “budget”, “scheduled”, “estimates”, “forecasts”, “guidance”, “outlook”, “intends”, “anticipates”, “believes”, or variations of such words and phrases or that state that certain actions, events or results “may”, “could”, “would”, “might” or “will” be taken, occur or be achieved, or the negative of any of these terms or similar expressions. The Forward Looking Statements in this presentation relate to, among other things: expectations with respect to future production and financial performance at the Company’s operating mines; expectations with respect to the Company’s future financial position; the Company's potential for future growth; anticipated steps in the development of Vareš, including ramp up to full production and completion of construction of infrastructure, and the anticipated timing thereof; potential cost optimization opportunities at Vareš; the commencement of construction of the ramp towards the Wedge Zone (Block 250) at Chelopech and the anticipated timing thereof; anticipated timing of an initial mineral resource in respect of Wedge Zone; future development prospects at the Brevene Porphyry South prospect and the anticipated timing of a initial mineral resource and PEA; anticipated steps in the continued development of the Čoka Rakita project, including exploration, permitting activities, environmental assessments, and stakeholder engagement, and the timing for completion and anticipated results thereof; exploration activities at the Rakita Camp and the anticipated results thereof; forecasted rates of production in 2026 and in future years and related financial outlook for such years; anticipated results of exploration activities at the Company's operational and development properties; anticipated amounts of future expenditures at the Company's operating and development properties, including expenses related to exploration activities; closure and rehabilitation activities at Ada Tepe, and the anticipated timing thereof; expected cash flows; the price of gold, copper, and silver, and other minerals; estimated capital costs, all-in sustaining costs, operating costs and other financial metrics; currency fluctuations; results of economic studies; the potential to extend the Chelopech life of mine and the results of related exploration activities in connection therewith; permitting requirements, the ability of the Company to obtain such permits, and the anticipated timing thereof; and amounts of liquidity available to the Company.

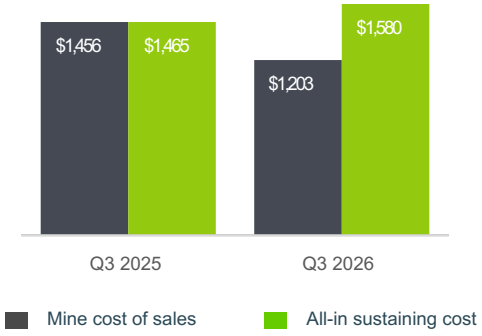

Forward Looking Statements are based on certain key assumptions and the opinions and estimates of management and Qualified Persons (in the case of technical and scientific information), as of the date such statements are made, and they involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any other future results, performance or achievements expressed or implied by the Forward Looking Statements. In addition to factors already discussed in this news release, such factors include, among others: fluctuations in metal prices, foreign exchange rates and oil prices; risks arising from the current economic environment and the impact on operating costs and other financial metrics, including risks of recession; the commencement, continuation or escalation of geopolitical crises and armed conflicts, including in Iran and the broader Middle East region, and their direct and indirect effects on the business and operations of DPM; risks arising from counterparties being unable to or unwilling to fulfill their contractual obligations to the Company; the speculative nature of mineral exploration, development and production, including changes in mineral production performance, exploitation and exploration results; the Company’s dependence on its operations at the Chelopech mine and the Vareš operation; changes in local, regional, and national governments, or changes in the administration of laws, policies and practices in the jurisdictions in which the Company operates; changes in laws and regulations applicable to the Company and its business and operations, and judicial interpretations thereof; uncertainties inherent with conducting business in foreign jurisdictions where corruption, civil unrest, political instability and uncertainties with the rule of law may impact the Company’s activities; potential disputes and uncertainties with respect to the Company’s concessions, permits, and land title rights, as well as the related legal systems in the jurisdictions in which the Company operates; in respect of the Constitutional Court decision discussed herein, there are uncertainties with respect to the review by the authorities and the outcome thereof on DPM’s Concession Agreement and other instruments, as well as uncertainties with respect to DPM being able to be successful in its engagement and next steps to protect its rights, and how the outcome of such review may affect the Vareš operation, its ownership thereof, key contracts, permits and authorizations related thereto, its guidance, financial condition, the carrying value of its assets, liquidity, mineral reserves and other metrics, plans and expectations for Vareš and the Company, which assume that DPM’s Concession Agreement and other instruments, permits and authorizations will remain unaffected; the issues underlying the Constitutional Court decision and prior decisions thereof could, if not resolved, also give rise to additional challenges, opposition or otherwise affect other authorizations, permits and licenses that the Vareš operation currently relies upon or that it may need in the future; possible inaccurate estimates relating to future production, operating costs and other costs for operations; possible variations in ore grade and recovery rates; inherent uncertainties in respect of conclusions of economic evaluations, economic studies and mine plans; uncertainties with respect to the results of technical studies in respect of the Company’s exploration and development properties; the Company’s dependence on continually developing, replacing and expanding its mineral reserves; the ability of the Company to extend the Chelopech mine life; uncertainties and risks inherent to developing and commissioning new mines into production, which may be subject to unforeseen delays; risks related to the possibility that future exploration results will not be consistent with the Company’s expectations, that quantities or grades of reserves will be diminished, and that resources may not be converted to reserves; risks associated with the fact that certain of the Company's initiatives are still in the early stages and may not materialize; risks related to the Company's ability to develop the Loma Larga project and to obtain necessary permits in respect thereof; changes in project parameters, including schedule and budget, as plans continue to be refined; risks related to the financial results of operations, changes in interest rates, and the Company's ability to finance its operations; the impact of global liquidity and credit availability on the timing of cash flows and the values of assets and liabilities based on projected future cash flows; uncertainties inherent with conducting business in foreign jurisdictions where corruption, civil unrest, political instability and uncertainties with the rule of law may impact the Company’s activities; potential disputes and uncertainties with respect to the Company’s concessions, permits, and land title rights, as well as the related legal systems in the jurisdictions in which the Company operates; the effects of international economic and trade sanctions; accidents, labour disputes and other risks inherent to the mining industry; failure to achieve certain cost savings; risks related to the Company's ability to manage environmental and social matters, including risks and obligations related to closure of the Company's mining properties; risks related to climate change, including extreme weather events, resource shortages, emerging policies and increased regulations relating to related to greenhouse gas emission levels, energy efficiency and reporting of risks; land reclamation and mine closure requirements, and costs associated therewith; the Company's controls over financial reporting and obligations as a public company; delays in obtaining governmental approvals or financing or in the completion of development or construction activities; opposition by social and non-governmental organizations to mining projects; uncertainties with respect to realizing the anticipated benefits from the development of the Company’s exploration and development projects; cyber-attacks and other cybersecurity risks; competition in the mining industry; exercising judgment when undertaking impairment assessments; claims or litigation; limitations on insurance coverage; changes in values of the Company's investment portfolio; changes in laws and regulations applicable to the Company and its business and operations; the Company's ability to successfully obtain all necessary permits and other approvals required to conduct its operations; employee relations, including unionized and non-union employees, and the Company's ability to retain key personnel and attract other highly skilled employees; ability to successfully integrate acquisitions or complete divestitures; unanticipated title disputes; volatility in the price of the common shares of the Company; potential dilution to the common shares of the Company; damage to the Company’s reputation due to the actual or perceived occurrence of any number of events, including negative publicity with respect to the Company’s handling of environmental matters or dealings with community groups, whether true or not; risks related to holding assets in foreign jurisdictions; conflicts of interest between the Company and its directors and officers; the timing and amounts of dividends; there being no assurance that the Company will purchase additional common shares under its normal course issuer bid, as well as those risk factors discussed or referred to in the Company’s most recent MD&A and AIF, and other documents filed from time to time with the securities regulatory authorities in all provinces and territories of Canada and available on SEDAR+ at www.sedarplus.ca.

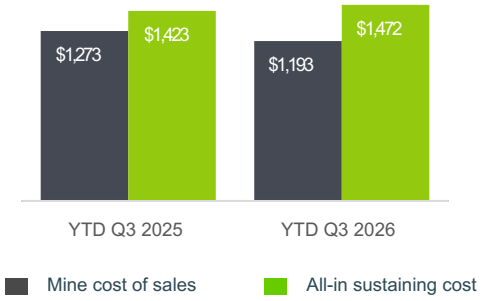

The reader has been cautioned that the foregoing list is not exhaustive of all factors and assumptions which may have been used. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in Forward Looking Statements, there may be other factors that cause actions, events or results not to be anticipated, estimated or intended. There can be no assurance that Forward Looking Statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. The Company’s Forward Looking Statements reflect current expectations regarding future events and speak only as of the date hereof. Other than as it may be required by law, the Company undertakes no obligation to update Forward Looking Statements if circumstances or management’s estimates or opinions should change. Accordingly, readers are cautioned not to place undue reliance on Forward Looking Statements.

Non-GAAP Measures

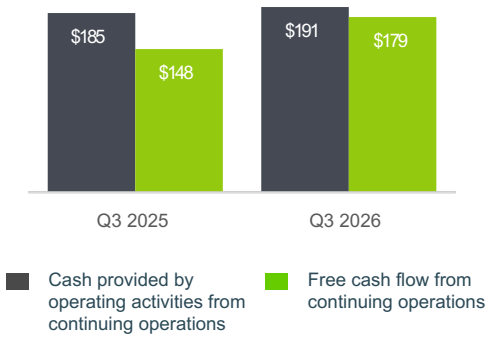

Certain financial measures referred to in this presentation are not measures recognized under IFRS and are referred to as Non-GAAP financial measures or ratios. These measures have no standardized meanings under IFRS and may not be comparable to similar measures presented by other companies. The definitions established and calculations performed by the company are based on management's reasonable judgment and are consistently applied. These measures are intended to provide additional information and should not be considered in isolation or as a substitute for measures prepared in accordance with IFRS. This slide presents the most directly comparable measures under IFRS to those Non-GAAP financial measures used in this presentation. For a detailed reconciliation of Non-GAAP financial measures or ratios, please refer to the "Non-GAAP Financial Measures" section on pages 35 to 43 of the Management's Discussion and Analysis ("MD&A") for the three and nine months ended September 30, 2026, available on our website at www.dpmmetals.com and on SEDAR+ at www.sedarplus.ca.

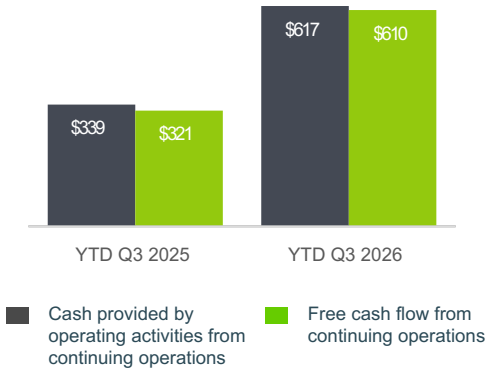

Mine cost of sales and All-in sustaining cost[1,5] ($/GEO sold)

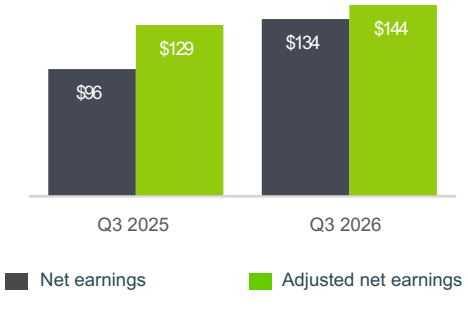

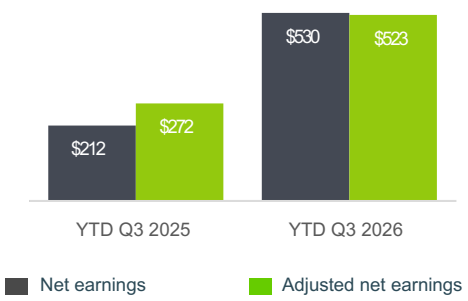

Cash provided by operating activities and Free cash flow[2] ($M)

Net earnings and Adjusted net earnings[3] ($M)

Q3 2026 Highlights

Third Quarter Highlights

Performance demonstrates strengths that underpin growth strategy

☑ Operational Delivery

- **On track** to meet 2026 GEO[5] production guidance[4] for the 12th consecutive year
- **Achieved Vareš commercial production** ahead of schedule; ramp-up on track for **year-end 2026**

☑ Generating Strong Margins

- Q3 all-in sustaining cost[1,5] per GEO sold: **$1,580/oz.** (includes **$270/oz.** mark-to-market adjustment to share-based compensation)
- **On track** to meet 2026 AISC guidance[4]

☑ Advancing Growth Pipeline

- Increased 2026 exploration spending to **$75 - 80 million**, reflecting strong results
- **High-grade Wedge Zone** prospect
- Major discovery at **Brevene Porphyry South**
- Advancing **Čoka Rakita** procurement
- **Rakita Camp Tier One** gold asset potential

☑ Strong Financial Position

- **$179 million** of free cash flow[2]
- **$144 million** of adjusted net earnings[3]
- **$172 million** of capital returned to shareholders YTD
- **$839 million** in cash
- Undrawn **$400 million** credit facility

1. Refer to footnote #1 on slide 20. 2. Refer to footnote #2 on slide 20 3. Refer to footnote #3 on slide 20. 4. Refer to footnote #4 on slide 20. 5. Refer to footnote #5 on slide 20.

Vareš Ramping up to Full Production in 2026

On track to achieve ramp-up to 850,000 tonne per year run-rate by year-end

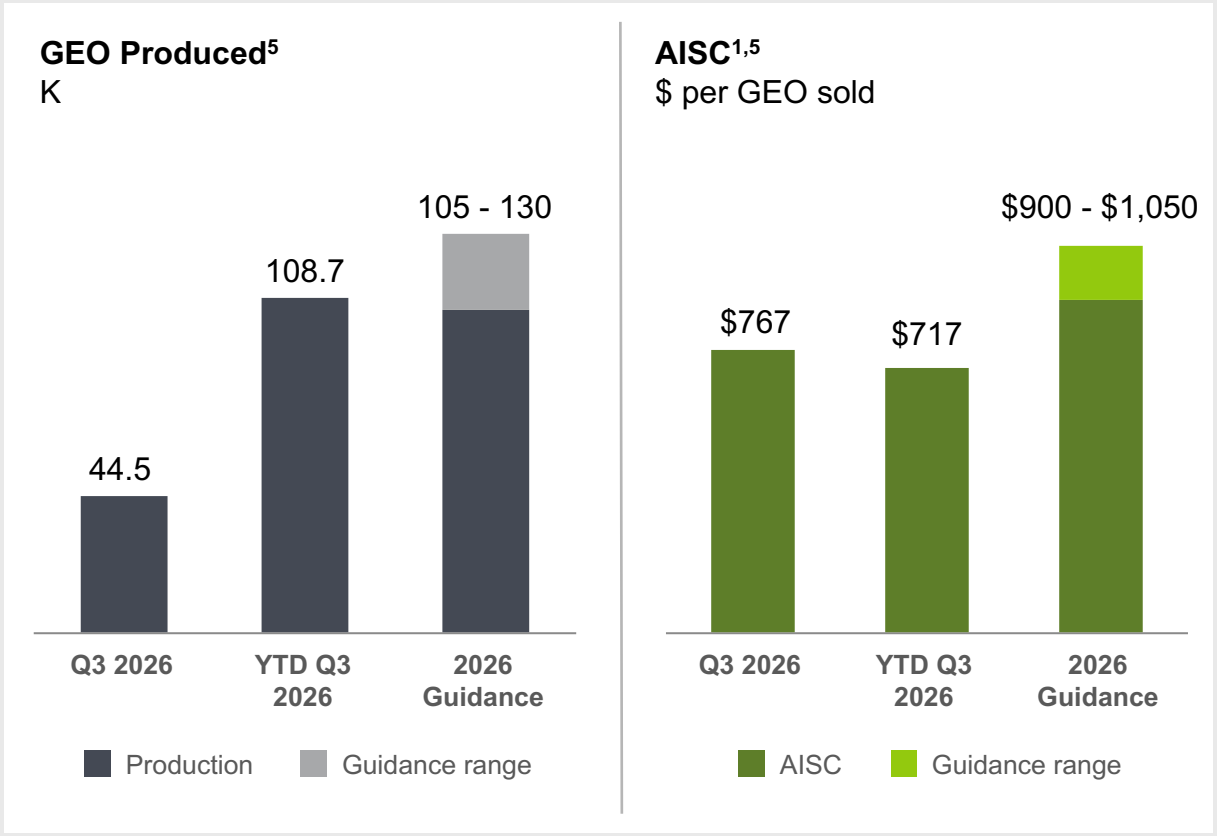

2026 a transitional year for Vareš

- Achieved commercial production in August
- Second tailings filter expected to commission in November
- Accelerating gold and silver production
- Commenced surface drilling program in Q2
- Strong third quarter performance:
  - Produced 44,456 GEO[5] and **expected to exceed high-end of production guidance**[4]
  - All-in sustaining cost[1,5] of $767 per GEO sold

Optimization for 2027 and beyond

- Evaluating opportunities to optimize cost structure following commercial production

2026 Guidance[4]

1. Refer to footnote #1 on slide 20.
4. Refer to footnote #4 on slide 20
5. Refer to footnote #5 on slide 20.

Chelopech: Near-Term Growth Underpinned by Consistent Delivery

On-track to meet 2026 guidance

		Q3 2026	Q3 2025	YTD Q3 2026	YTD Q3 2025	2026 Guidance[4]
Ore processed	Kt	530	557	1,586	1,631	2,100 - 2,200
Head grades:						
Gold	g/t	2.87	3.02	2.86	2.99	
Silver	g/t	6.29	7.15	12.7	6.71	
Copper	%	0.56	0.77	0.70	0.68	
Recoveries:						
Gold	%	83.6	81.9	79.5	82.0	
Silver	%	42.7	41.8	58.5	42.3	
Copper	%	83.9	82.1	83.1	82.5	
GEO produced[5]	Koz	49.7	54.9	149.1	157.6	185 - 215
GEO sold[5]	Koz	45.0	49.0	134.5	135.1	170 - 190
Cash cost per tonne of ore processed	$/t	78	63	75	60	69 - 74
Mine cost of sales[1,5]	$/GEO sold	1,085	915	1,070	909	
All-in sustaining cost[1,5]	$/GEO sold	1,460	1,217	1,365	1,152	1,250 - 1,400

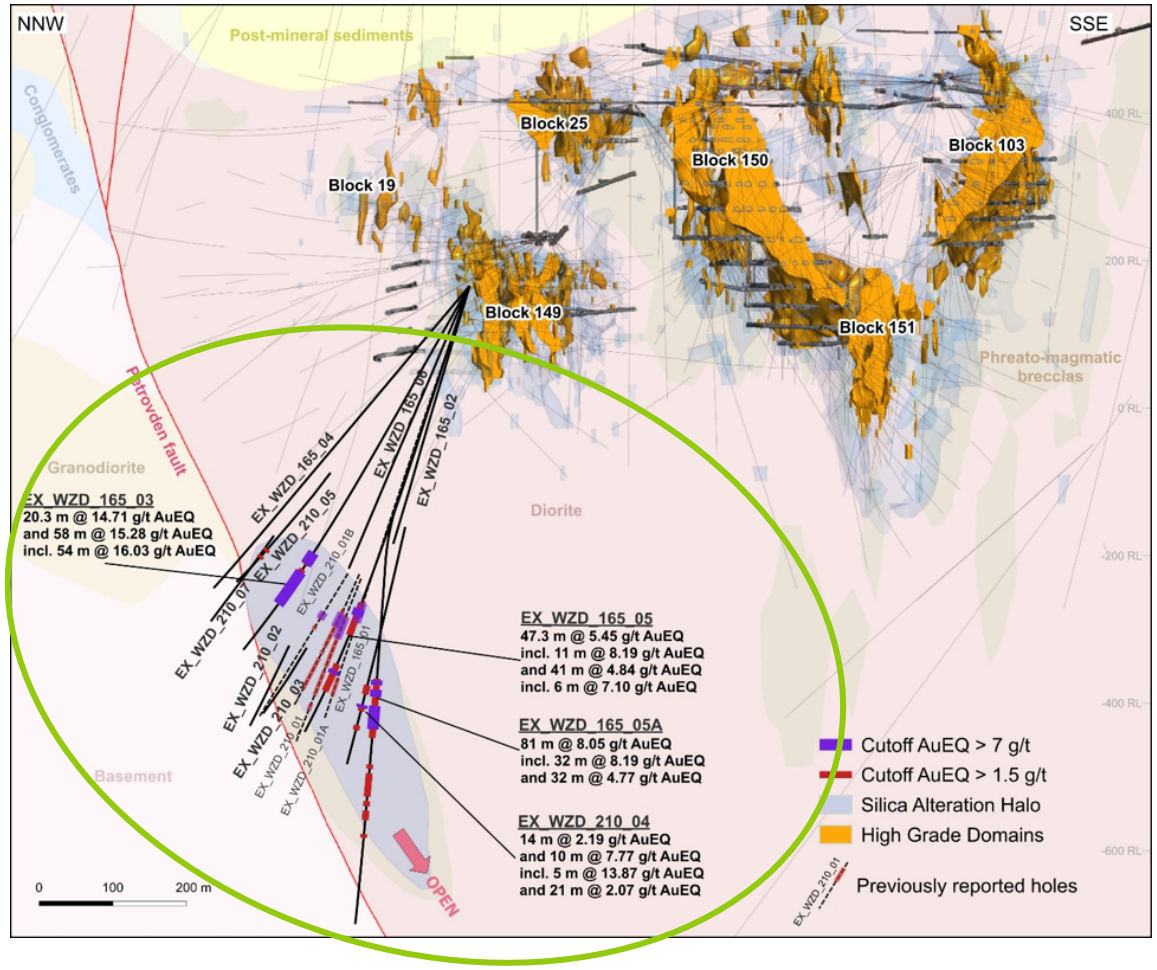

1. Refer to footnote #1 on slide 20.
4. Refer to footnote #4 on slide 20.
5. Refer to footnote #5 on slide 20.

Wedge Zone (Block 250): High Quality, Near-Term Growth

Located in Chelopech mine concession approximately 250 m below existing Mineral Reserves

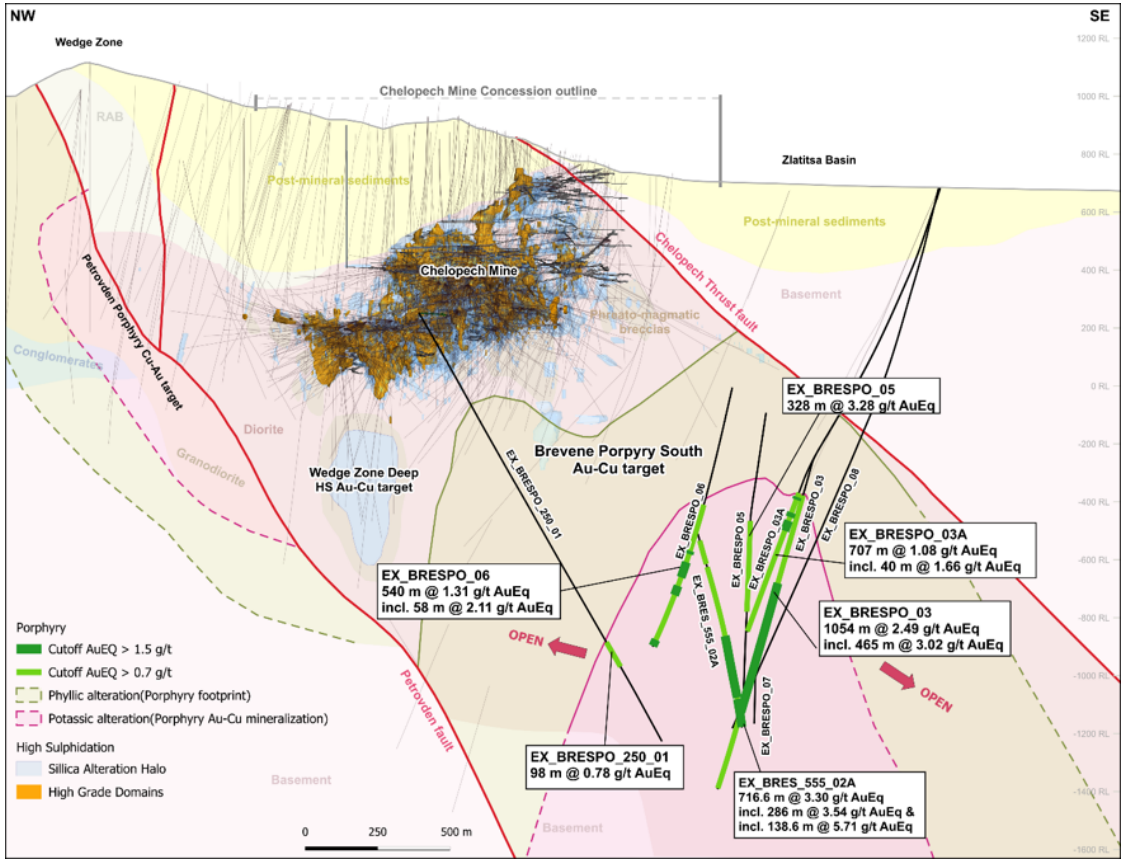

- Potential to augment Chelopech life of mine plan and for near-term higher grade mill feed by end of 2028
- Drilling in H1 2026 **continues to extend mineralization** at grades well in excess of existing Mineral Reserves:
  - EX_WZD_210_01: 68 m at 7.42 g/t AuEq
  - EX_WZD_165_03: 58 m at 15.28 g/t AuEq
  - EX_WZD_165_05A: 81 m at 8.05 g/t AuEq
- Similar dimensions to DPM's Čoka Rakita project: 150m x 100m x 350m
- H2 2026 drilling program seeks to **extend and infill** existing mineralization
- **Ramp development** commencing in **Q4 2026;** expect to commence construction of the twin declines in Q1 2027
- Wedge Zone initial **Mineral Resource** estimate expected by **year-end 2026**

Brevene Porphyry South

Major discovery of high-grade gold-copper porphyry system adjacent to Chelopech mine

- Results demonstrating **grade**, **scale** and **continuity**
  - EX_BRES_555_02A: 717 m at 3.30 g/t AuEq, including 139 m at 5.71 g/t AuEq
  - EX_BRESPO_03: 1,054 m at 2.49 g/t, including 465 m at 3.02 g/t AuEq
  - Widths and grades are **well above** typical porphyry benchmarks
- Mineralization footprint exceeds **500m x 500m** and extends over **1,000 m** vertically
  - Open to the north, south, west and at depth
- Results confirmed **extension onto the Chelopech mine concession**, to where drilling will be transitioning to further expand known mineralization
  - Up to 8 high-capacity drill rigs
  - **15,000 metres** planned through end of 2026
- Initial **Mineral Resource** estimate planned for **H2 2027** and to support **PEA** planned for **H1 2028**

Čoka Rakita Project: High-Margin Production Growth

Swift advancement to date underpinned by +20 years of in-country experience

- From discovery in 2023 to feasibility in 2025
- Following October 2026 elections, administrative and regulatory decision making timelines may be extended as new government is formed
  - DPM will work with relevant authorities to align the scheduling of the project's next phase, if required by the process of the government's formation
- Continuing to advance engineering and procurement activities
  - Dismantling and refurbishing of the Ada Tepe mill components
  - Ramp-up of purchases and securing of fabrication timelines for critical equipment
  - Selection of underground contractor
  - Advancing detailed engineering
- Environmental and permitting activities
  - Special Purpose Spatial Planning process in progress

Project Highlights[6]

High-margin
underground gold mining operation

$644/oz. Au sold
all-in sustaining cost

$448M
initial capital expenditures

1.52 million oz Au
of Probable Mineral Reserves over a 10-year mine life

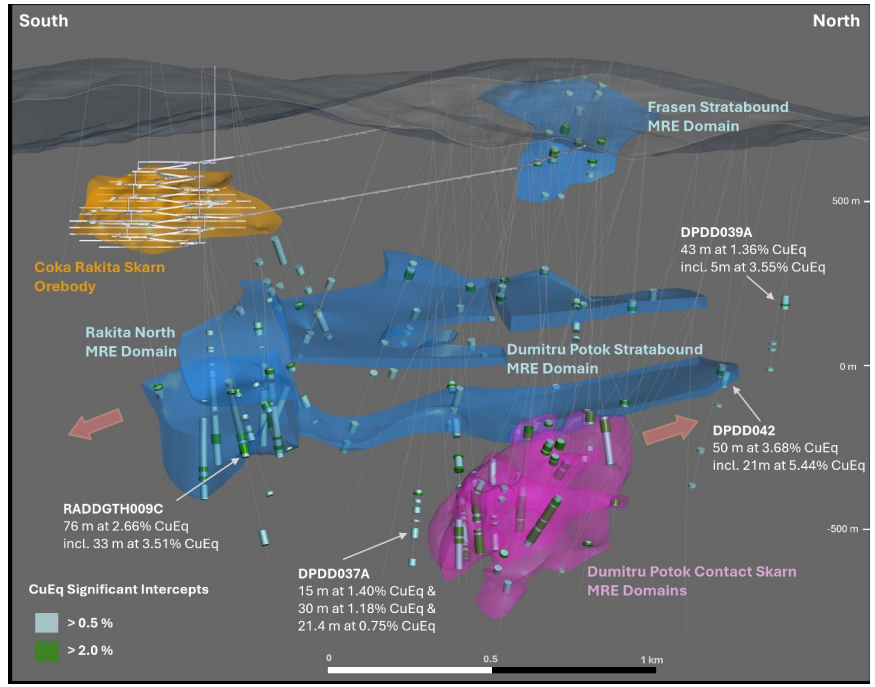

189,000 oz Au annual production
first 5 full years

6. Refer to endnote #6 on slide 20.

Dumitru Potok: Large Inferred Mineral Resource

Demonstrating Rakita camp's potential for district-scale gold-copper systems

- From discovery to Mineral Resource in 18 months
- **Resource expansion** as all three deposits remain open in multiple directions
- Significant, new 2026 intercepts from Dumitru Potok:
  - BIDD253: 246 metres grading 1.36% CuEq from 1,377 m
  - DPDD042: 50 metres grading 3.68% CuEq from 761 m
  - RADDGTH009C: 76 metres grading 2.66% CuEq from 623 m
- **Higher-grade core** at Dumitru Potok within 64Mt mineral resource
  - 2.2 million ounces of gold and 1.5 billion pounds of copper
  - Updated Mineral Resource expected by **Q1 2027**, supporting a **PEA targeting year-end 2027**
- Drill **program budget increased** up to an additional 15,000 metres with 10 drill rigs to expanding MRE, infill drilling and target testing

Inferred Mineral Resource Estimate[7]

Deposit	Tonnes (Mt)	Gold Grade (g/t)	Contained Gold (K oz.)	Copper Grade (%)	Contained Copper (Mlbs.)
Dumitru Potok	64.1	1.07	2,206	1.08	1,535
Rakita North	17.9	0.56	320	0.84	331
Frasen	2.4	1.21	95	0.70	37
Total	**84.4**	**0.97**	**2,621**	**1.02**	**1,903**

7. Refer to endnote #7 on slide 20.

Ada Tepe: Responsible Mine Closure

Restoring and returning 95% of the mine's footprint to the Natura 2000 protected area

From Operations to Rehabilitation

- Mining completed as planned in July 2026; rehabilitation well underway
- Technical rehabilitation of Integrated Mine Waste Facility (IMWF) targeted for year-end 2026
- On track to complete active site rehabilitation by year-end 2028
- Post-closure monitoring is planned for at least 10 years after closure and final reclamation

Demonstrates our commitment to responsibly developing, operating, and closing mining operations while supporting the long term sustainability and prosperity of local communities

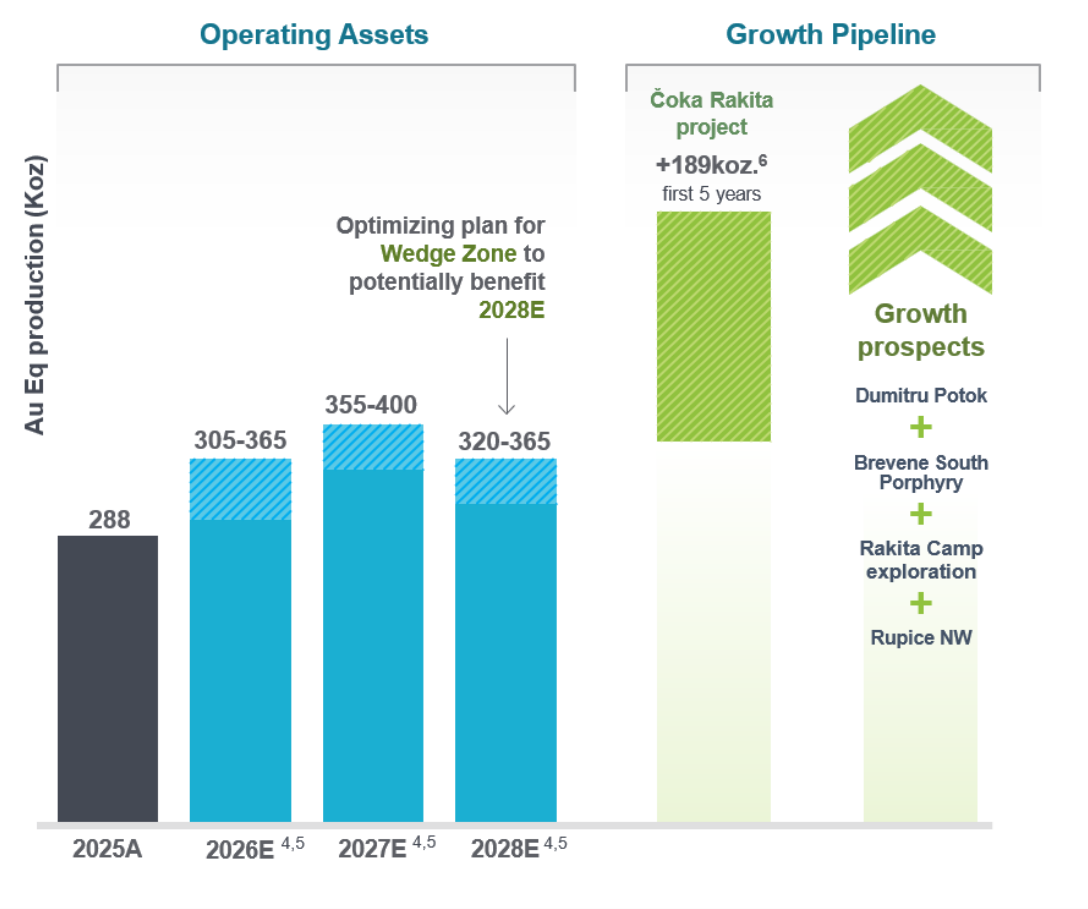

Ada Tepe's transition to rehabilitation

Follow the Ada Tepe story, visit www.dpmmetals-adatepe.com

Growing Precious Metals Producer

Demonstrated consistency and quality operations underpins business outlook and resiliency

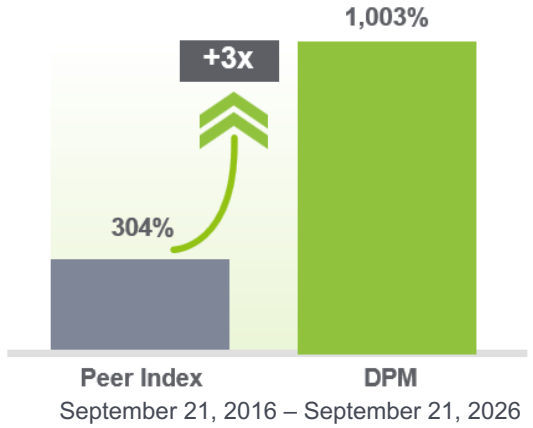

A Decade of Disciplined Value Creation and Delivery

11 consecutive years

Achieving gold production guidance **(2015 to 2025)**

NAVPS Performance (%) – Last Ten Years

September 21, 2016 – September 21, 2026

NAVPS has grown **+3x faster** since 2016

Source: FactSet. Market data as of September 21, 2026.
Peer index represents an equal-weighted index of OceanaGold, Centerra Gold, IAMGOLD, Eldorado Gold, B2Gold, Alamos Gold, Equinox Gold, and G Mining NAVPS, indexed to DPM net asset value per share on September 21, 2016.

Financial Strength to Fund Growth

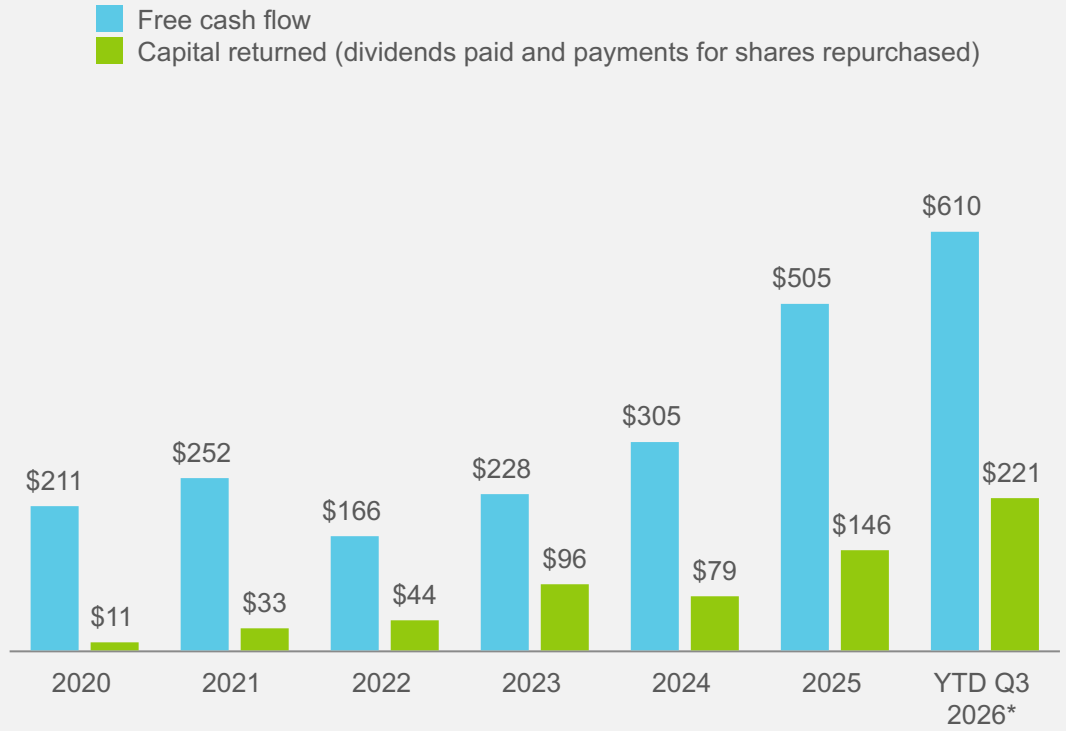

Growing cash position with no debt and a track record of shareholder returns

Financial Position

Shareholder Returns

$ millions

$198 million of shares repurchased year-to-date*

*Reflects shares repurchased as of November 11, 2026

Growing European Precious Metals Producer

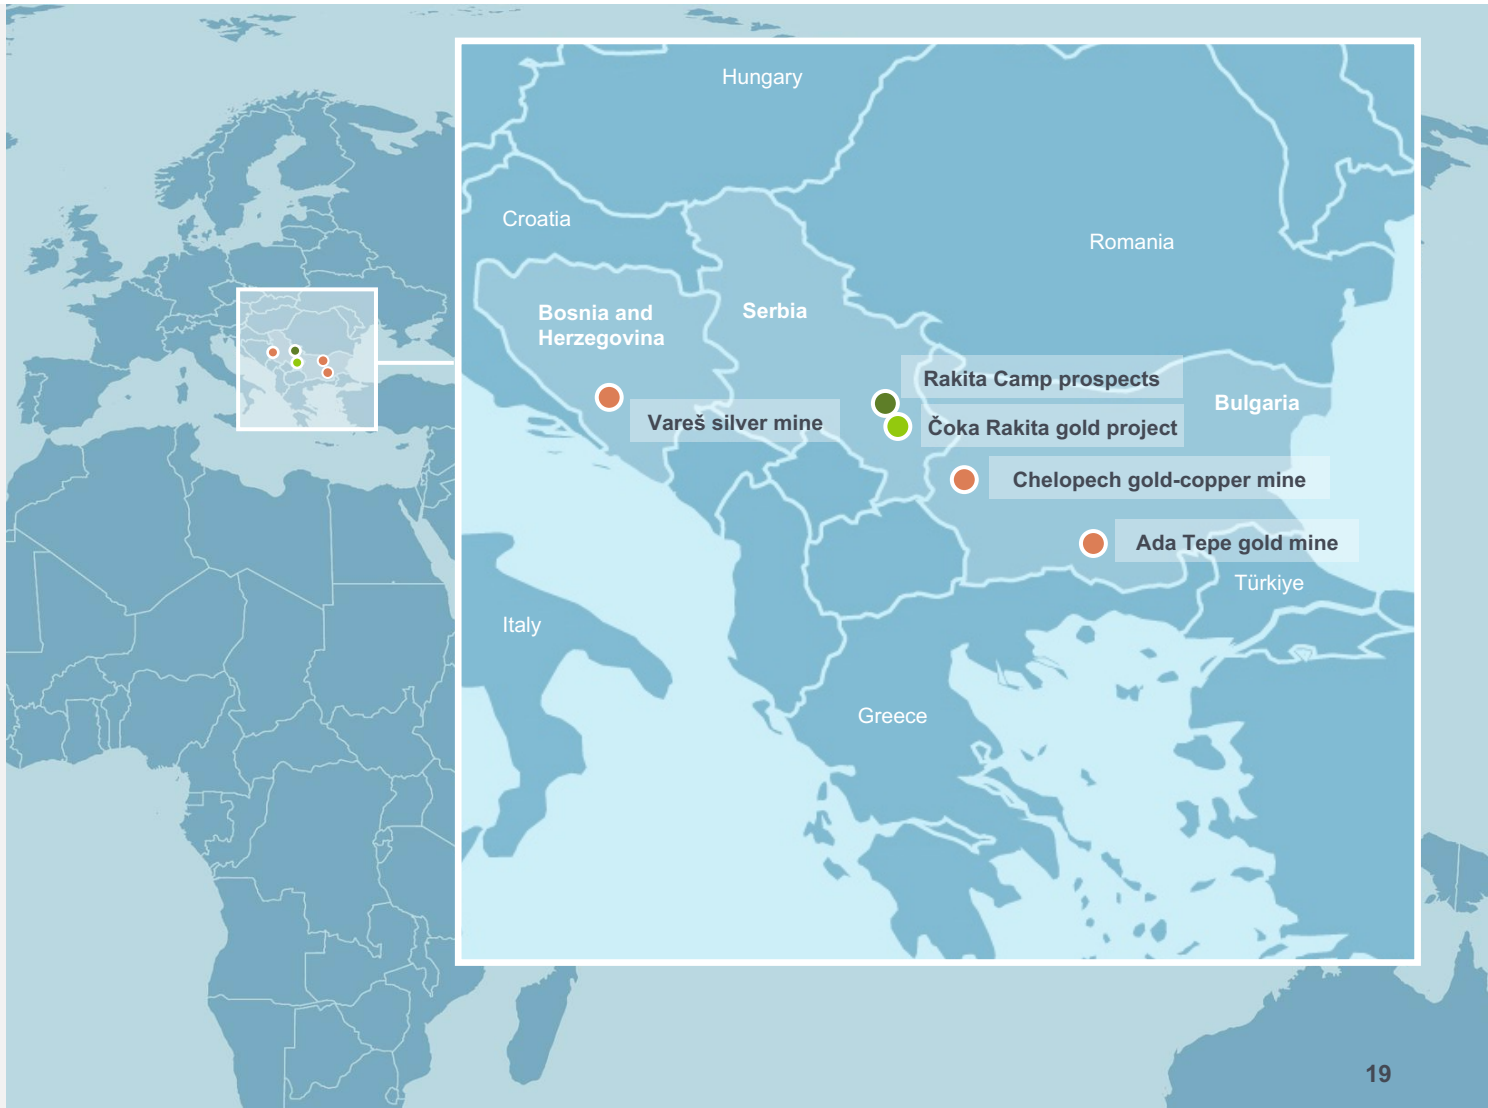

Consistent, quality operations in Europe delivering peer-leading growth and margins for high returns

Proven operator and production growth
Achieved production guidance for 11-years

Tier 1 geological potential
Four European ‘discoveries’ since 2023

European presence and scale
Stable, modernizing jurisdictions

High margin and capital discipline
Fully funded growth with capital returns

Footnotes

1 Cost of sales per GEO sold represents cost of sales for Chelopech, Ada Tepe and Vareš, divided by GEO sold. All-in sustaining cost per GEO sold, is a non-GAAP ratio which represents cost of sales less depreciation, amortization and other non-cash items plus treatment charges, penalties, transportation and other selling costs, cash outlays for sustaining capital expenditures and leases, rehabilitation-related accretion and amortization expenses and an allocated portion of the Company's general and administrative expenses based on mine's proportion of total revenue, divided by GEO sold. Non-GAAP measures have no standardized meaning under IFRS. For all non-GAAP measures discussed in this presentation, refer to the "Non-GAAP Financial Measures" section of the Company's MD&A for the three and nine months ended September 30, 2026 on pages 35 to 43 available on our website at www.dpmmetals.com and on SEDAR+ at www.sedarplus.ca for additional information, including why they are useful to investors, the additional purposes for which management uses these measures and, in the case of historical measures, a reconciliation with the nearest GAAP measures.

2 Cash provided from operating activities, before changes in working capital, is a non-GAAP financial measure defined as cash provided from operating activities excluding changes in working capital, which includes changes in share-based compensation liabilities, as set out in the Company's consolidated statements of cash flows. This measure is used by the Company and investors to measure the cash flow generated by the Company's operating segments prior to any changes in working capital, which at times can distort performance. Free cash flow is a non-GAAP measure and is defined as cash provided from operating activities, before changes in working capital, less cash outlays for sustaining capital, and any mandatory principal repayments and interest payments related to debt and leases.

3 Adjusted net earnings is a non-GAAP measure and is defined as net earnings attributable to common shareholders, adjusted to exclude specific items that are significant, but not reflective of the underlying operations of the Company, including: impairment charges or reversals thereof; unrealized and realized gains or losses related to investments carried at fair value; significant tax adjustments not related to current period earnings; and non-recurring or unusual income or expenses that are either not related to the Company's operating segments or unlikely to occur on a regular basis.

4 Forecast/guidance information is subject to a number of key assumptions, risks and uncertainties. Details of the Company's guidance and three-year outlook can be found in the MD&A for the three and nine months September 30, 2026, available on the Company's website at www.dpmmetals.com and on SEDAR+ at www.sedarplus.ca. See "Forward Looking Statements" on slide 2.

5 The Company uses conversion ratios for calculating GEO for its silver, copper, zinc and lead production and sales, which are calculated by multiplying the volumes of metal produced or sold, as applicable, by the respective assumed metal prices, and dividing the resulting figure by assumed gold price. The GEO calculated also includes minor quantities of other metals that are not considered material.

6 See the "NI 43-101 Technical Report Čoka Rakita Project Feasibility Study, Eastern Serbia" dated January 9, 2026, for additional information, which has been posted on the Company's website at www.dpmmetals.com and filed on SEDAR+ at www.sedarplus.ca.

7 For additional information regarding exploration activities in Serbia, see the technical report entitled "Technical Report – Mineral Resource Estimate for Dumitru Potok, Frasen and Rakita North Prospects, Eastern Serbia" dated January 16, 2026, available on the Company's website at www.dpmmetals.com and SEDAR+ at www.sedarplus.ca.

8 Average realized price is a non-GAAP ratio and represents the average price per unit recognized in the Company's consolidated statements of earnings (loss) prior to any deductions for treatment charges, refining charges, penalties, freight and final settlements to adjust for any differences relative to the provisional invoice.
